

# RECOMMENDED TOOLS

This page reflects our personal experience and preferences.

A very extensive collection of open-source testing tools could be found at the site [opensource testing](#)

[Apache JMeter](#) is a good open-source HTTP/S loading and performance testing tools competing with curl-loader.

[SIPp](#) is an excellent open-source SIP protocol loader.

Some good commercial application loading and testing tools (but they are very expensive) are here:

1. [RadView WebLoad](#)
2. [Mercury Interactive \(HP\) Tools](#)
3. [Spirent Avalanche](#)
4. [IXIA IxLoad](#)
