Ascii Art sample

## Table of contents

1. Sample Ascii Art

To create a `.png` image like the one below with ASCII art, just save the text file with the `.aart` extension and then link from any page as an image (`<image src="asci-art-file.png"/>`).

<p align="center">cocoon pyramid of management-(logic-content-style)</p>

Here is the source file that has created the above image.

```
        +-------------------+
        |    Management     |
        +-+-------+-------+-+
          |       |       |
          |       |       |
  +-------+  +----+----+  +-------+
  | logic +--+ content +--+ style |
  +-------+  +---------+  +-------+
```

An ascii art pad recognized following ascii characters:

- '-' horizontal SVG line
- '|' vertical SVG line
- '+' corner
- \ oblique line
- String starting with letter, digit, or '_' is converted to a SVG text.
